

# Make Your Own Popsicle Stick Hexagon Shelf!

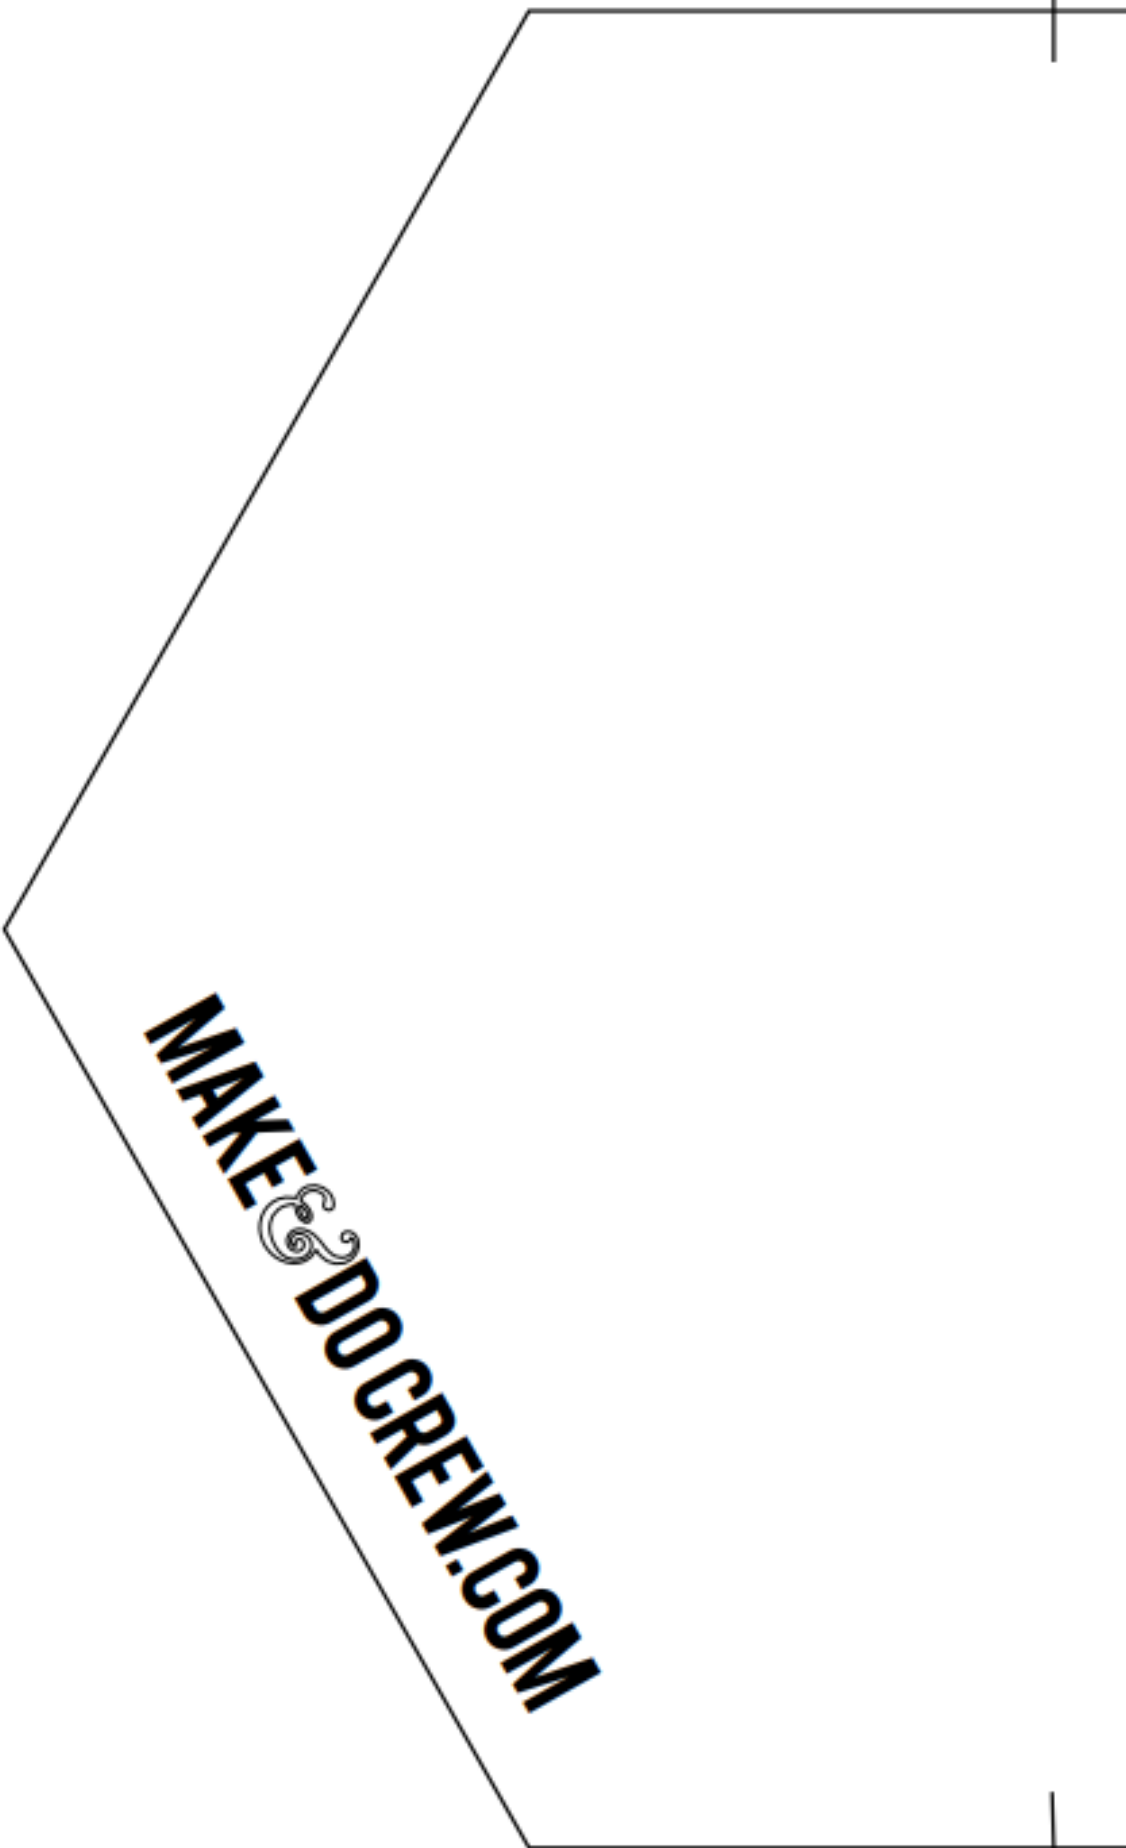

## Supplies:

1. About 100 popsicle sticks
2. Tacky glue (other kinds of glue would also probably work)
3. Hexagon template

## Instructions:

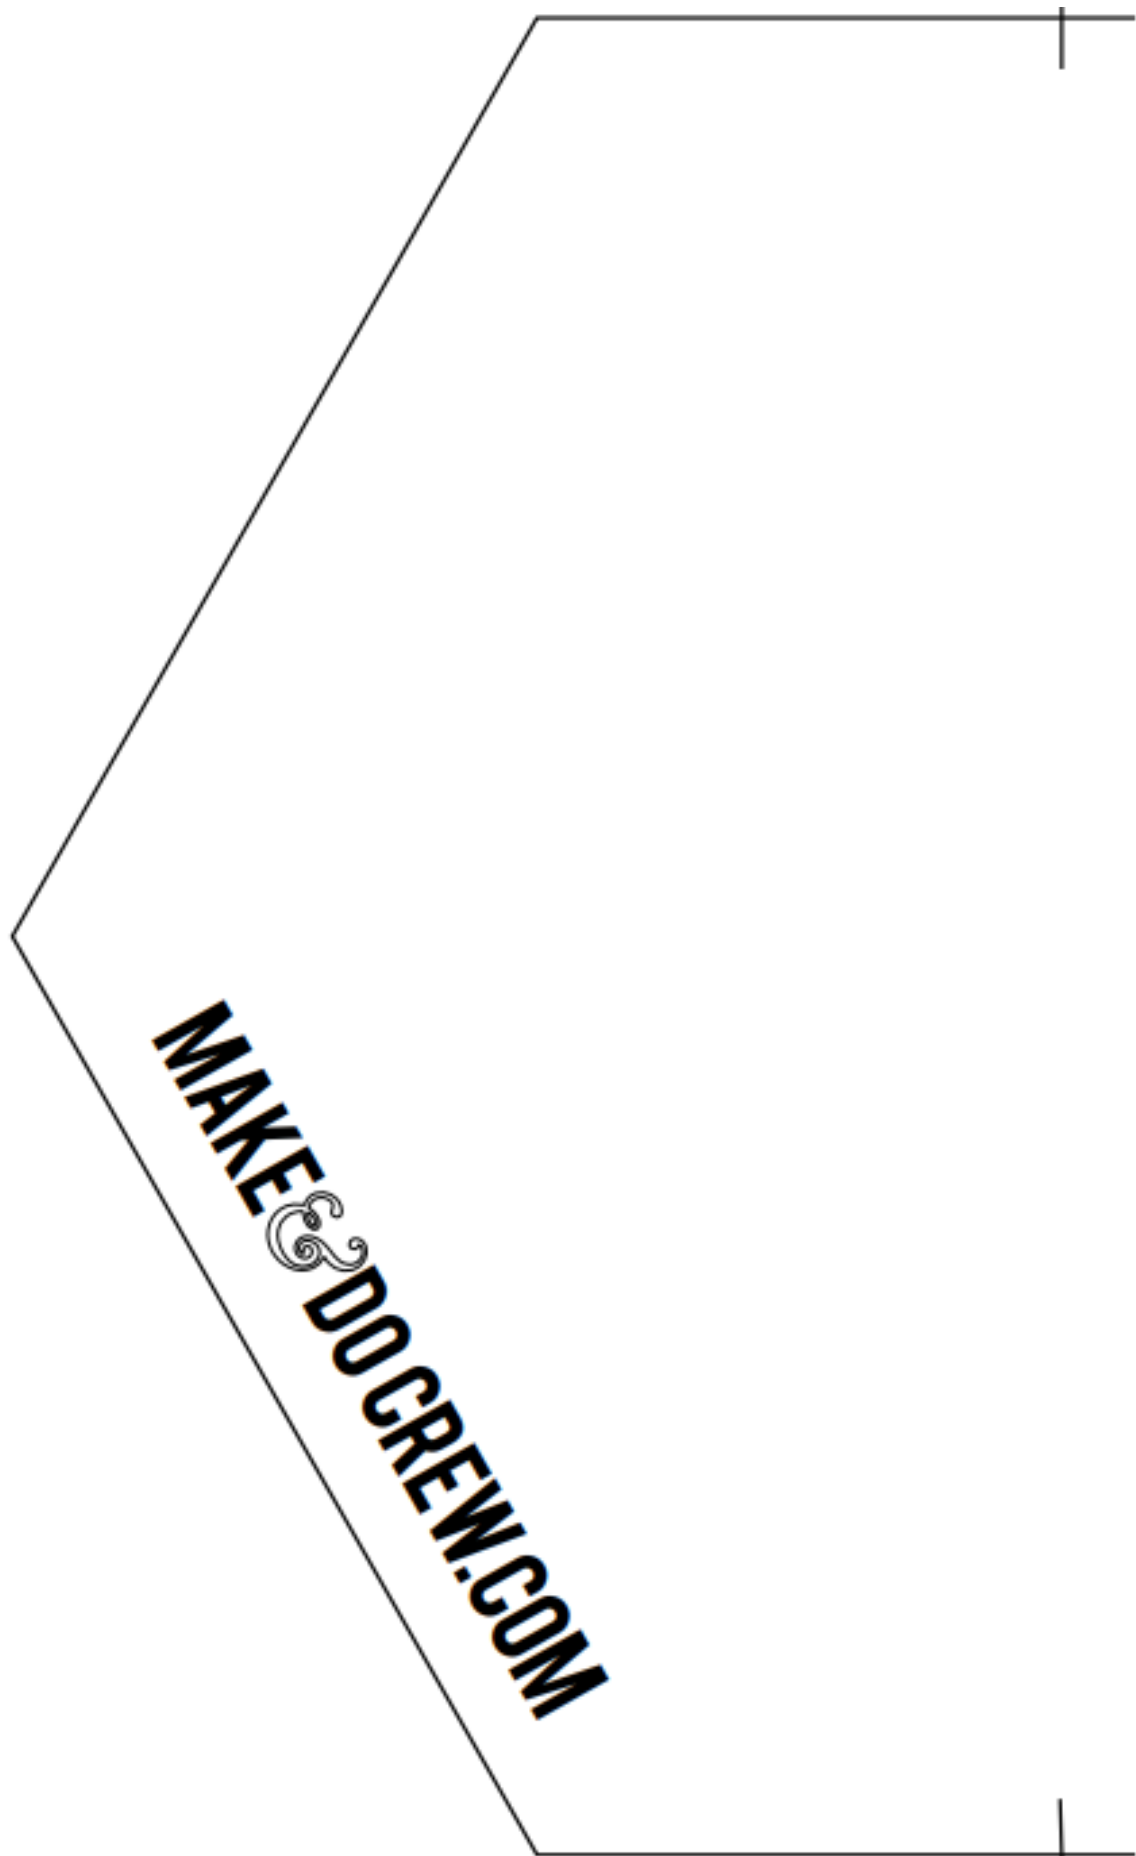

1. Connect the two halves of the template so they line up to form a hexagon.
2. Lay three popsicle sticks inside the hexagon as shown.
3. Add a dot of glue to the ends of each stick.
4. Add three more sticks on top, dot more glue on the ends, and keep going until you've used all the sticks.
5. You now have a finished shelf! You can hang it from nails, add a picture hanger, or just set it on another shelf or table! You can also paint or stain it!
